

Project 6: Web Application

Criteria

1. **Structure:** Project code is clean, readable and DRY.
2. **Structure:** Project follows best practices.
3. **Requirements:** Student worked with an API and/or Firebase.
4. **Requirements:** Student allows for user interactions to create dynamic content through the React library.
5. **Communication:** Student participates in class discussion and was active in seeking help, demonstrations professionalism when interacting with peers, mentors and instructors.
6. **Communication:** Articulates problems they are facing thoughtfully, and can speak to their troubleshooting attempts.
7. **Project Management:** Student manages time wisely, and had a strategy to keep themselves organized.
8. **Project Management:** Student showed up on time and were present at each lesson.
9. **Presentation:** Student speaks clearly and loud enough for everyone to follow and pay attention.
10. **Presentation:** Student presented project information clearly and effectively. And project was deployed for presentation.

Must haves:

- Use React.
- Interact with either an API and/or Firebase
- Allow for user input.
- Modular component
- Must be deployed for project presentation
- Must be responsive!

Nice to haves:

- Add authentication with Firebase.
- Utilize React Router
